

1. Register an account at [smartripplatform.io/account/](https://smartripplatform.io/account/) or by clicking on the Participate in the ICO button on the main page at [smartripplatform.io](https://smartripplatform.io). During registration you will be asked to provide you first and last name and email address. You will receive a confirmation link by email - click on it to confirm your registration, after which you will be able to access your user area by entering your login (email address) and password).

In your user area, you can change your personal and security data by clicking on your login name in the top right corner.

2. To purchase tokens, switch to the Dashboard in your account.

3. Using the calculator tool, choose the cryptocurrency you want to use to pay for your purchase. Enter either the desired amount of TASH you want to buy or the amount in your chosen cryptocurrency that you wish to spend - use the arrow in the calculator to switch between the two options. Your discount will be calculated automatically depending on the current price of the token and the contribution amount. You will see your total discount rate in the bottom left corner.

In order to receive an additional discount, use your referral link - send it to anyone you know who could be interested in purchasing TASH tokens. You will find the link in the Referral Link section of your user area.

4. Click Contribute.

**5. If your contribution exceeds \$10 000 (in a cryptocurrency equivalent), you will be prompted to complete the KYC procedure. Once you upload a scan of your ID and a proof of residence (such as a utility bill, a letter from a bank containing your address, etc.), click Save and you will be redirected back to the token purchase page. If your contribution is less than \$10 000 in a cryptocurrency equivalent, you will be able to complete the KYC at a later date, but in any case before the last day of the ICO.**

6. Enter your Ether wallet number - your TASH tokens will be sent to that wallet once you complete the payment. DO NOT enter a number

of a digital exchange wallet or a JAXX wallet. We recommend that you register one of the following ERC20-compatible Ether wallets:

- [MyEtherWallet](#) (nodownloadneeded)
- [MetaMask](#)(Firefox and Chrome browser addon)
- [Mist](#) (Desktop)
- [Parity](#) (Desktop)
- [imToken](#) (iPhone)

7. Click Continue - you will see a wallet number for your chosen cryptocurrency. Make a transfer of the selected amount to that wallet.

8. Once the payment is confirmed, your TASH tokens will be sent to your Ether wallet.

9. In order to visualize your TASH tokens in your wallet, go to Tokens and add the token by filling in the following fields: contract address 0x002f06abe6995fd0ea4be011c53bfc989fa53ce0, decimals 18, code TASH.

10. If you have any other questions, feel free to contact us in our official [Telegram](#) group or at [info@smartripplatform.io](mailto:info@smartripplatform.io). We will be pleased to assist you.
